50X1-HUM

1. Exports of coal to the Soviet Union and to the Soviet Zone of Germany totaled approximately 9,500,000 tons for the second quarter of 1951; for this period there was no appreciable change from the first quarter figures on exports to Czechoslovakia and Scandinavian countries. Home market consumption for the second period totaled 9,000,000 tons.
2. The exports envisage a critical situation in supplies for home consumption, particularly for domestic heating, for the last three months of 1951. Certain allocations for industry will be cut, and the minimum allocations for domestic heating generally will not be met.
